## Latex Paint Disposal

Latex paint will not be accepted at Household Hazardous Waste collections. It can be disposed of at home because it does not contain toxic material. The easiest way to dispose of paint would be to use it up completely. Apply a second coat to your project; use it up on a piece of old cardboard, or scrap wood. Let the can dry out and dispose of it in your regular garbage. You can add shredded newspapers, kitty litter or Waste Paint Hardener (available at most hardware stores) to your latex paint. Let the paint dry out completely. This should be done in a well-ventilated area and away from children and pets. After the paint has dried, put the container in your garbage with the lid off so the garbage hauler knows the can is empty.
