

Construction of improvements to existing lead service lines located throughout the Town of Harrison at a total construction cost of \$6,899,948.02 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by replacing existing lead service lines to comply with current Federal and State Lead and Copper Rule requirements. The replacement work will allow the Town to continue to deliver safe drinking water to all residents and businesses within the Town's service area.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
